

Regional and local climate risk assessments are critical for collective decision-making on how to adapt to climate risks, prioritise goals and visions, and coordinate adaptation processes across various aspects of community living.

THE OPEN CALLS

Through two open calls, CLIMAAX aims to select at least 60 regions and/or communities that will implement the proposed methodological Framework and supporting Toolbox to conduct regional/local multi-risk Climate Risk Assessments.

The consortium is looking for individual applications from public bodies and non-profit legal entities to design and implement a comprehensive climate multi-risk assessment. The entities have to be established in any EU Member States and its Overseas Countries and Territories or Horizon Europe Associated Countries. Selected applicants will receive:

- Up to EUR 300,000 lump sum funding per project;
- Access and bespoke support to the CRA toolbox;
- Methodological guidance and support through the CLIMAAX helpdesk;
- Technical advice and counseling to implement the locally tailored methodologies using local data and approaches;
- Access to the outreach and engagement events.

THE PROJECT

CLIMAtE risk and vulnerability Assessment framework and toolboX is an EU-funded project (2023-2026) fueling regional resilience. CLIMAAX is committed to furnishing practical assistance, aiding in the implementation of methodological Frameworks, and facilitating the utilisation of the supporting Toolbox for conducting comprehensive multi-risk climate assessments.
