

Community of Practice webinar | Shaping regional resilience: Climate risk management in action

Date: 16 September 2026

Time: 14:30 - 15:30 CEST

Platform: [Zoom](#)

Description

Climate change is now determining the way societies interact with nature. Risk perception, prevention and management are strongly intertwined with the more frequent and extreme weather patterns, heightening exposure and vulnerability. Building long-term resilience is more than a mere technical debate; it is a matter of integrating innovative governance approaches with evidence-based, collaborative real-world solutions.

This webinar brings together voices from European projects [CARMINE](#) and [Pathways2Resilience](#) working with European regions at the forefront of climate risk governance. Speakers will share lessons learned, tools and pathways to turn risk assessment into concrete resilience, building governance capacity and fostering local action.

Agenda

14:30 – 14:35 | Welcome and introduction

Moderator: Fulvio Biddau, CMCC

14:35 – 14:50 | Living Labs as Catalysts for Evidence-Based Climate Risk Governance: Insights from the CARMINE Project

Speaker: Cristian Ioja, University of Bucharest - [CARMINE project](#)

14:50 – 15:05 | From Climate Risk to Resilient Destinations: Lessons from Labin and Poreč (Croatia)

Speakers: Lara Leko and Dino Jeričević, REGEA - [P2R project](#)

15:05 – 15:30 | Q&A and panel discussion

Moderator: Lisa Ferrari, CMCC
